

Public Works/Sewer-Water Department

GEORGE LUTZ
Commissioner

8/21/87

TO: Mayor Gerald R. Bennett

FROM: Commissioner George T. Lutz

SUBJECT: management of dumping and grading at 19 acre park site.

I met w/ Mr. Harper of FILL incorporated and informed him that if he was interested in continuing to fill the forty acre park site it would be necessary that he consider moving his field office, his tank truck and his tractors to the 19 acre site with the understanding that he would comply with the following:

1. Furnish a certificate of Insurance holding the city harmless
2. Clearing the tributary of debris and the grading of the banks.
3. Leveling of the existing fill and grading any additional fill to the engineers gradients under the engineers direction.
4. That he set in place all necessary posts, chains or cable to secure the site from fly dumpers
5. That he agree to set up a field office and maintain a tipping log showing, the date, the time materials arrived, name of trucking firm delivering materials, cab no., description of materials, where materials were picked up and on every Monday morning deliver to the Dept. of Public Works the prior weeks copy of the daily log, a copy of which will be submitted to the E.P.A..
6. That he agree to maintain a water wagon for dust control.
7. That the only type of fill that will be accepted will be of non organic materials consisting of concrete w/ no rebar, clean brick and mortar, sand, stone, clay, loam and black dirt. no concrete, brick and stone shall be dumped unless there shall be cover of over one foot of clay, loam or black dirt.\
